Project Highlights

Title: Hotel Room Booking Project

- Worked as a Front-end Developer in a hotel room booking project. Responsible for developing the user interface based on client requirements. The project utilized React.js for front-end development and Tailwind CSS for design.

Responsibilities:

- Utilized React.js to develop the user interface according to client specifications.
- Collaborated with the design team to implement an intuitive and visually appealing admin interface.
- Mainly concentrated efforts on the development of the admin section.
- Implemented features that enabled admins to create and manage room details efficiently.
- Actively participated in code review sessions to maintain code quality and best practices.

Projects

Speechly Budget Tracker | React Js | Material UI | Speechly API | React Charts

- A web application that takes voice input and tracks the Savings and Expenditures of the user and that data will be represented in graphs.

Facebook Clone | React Js | Material UI | Firebase | Context API

- A web app that has features where users can post pictures, like, comment, profile update etc.

Portfolio | React Js | Tailwind CSS

- A personal portfolio website that showcases a diverse collection of web development projects that highlight my skills and expertise in front-end
